

The Customer is the “Resource Owner”, owns an PhonePe Wallet account and maintains funds in his account. While shopping with the Amazon, upon adding the products to the cart and proceed for checkout, the Amazon application shows up the payment options as Pay Through Wallets along with PhonePe as one of the Wallet option.

If Amazon has to collect the order amount onbehalf of the Resource Owner from PhonePe Wallet, The Resource Owner should provide the credentials of the PhonePe Wallet to the Amazon application, so that they can contact or reach to PhonePe using the resource owner credentials asking them to process or initiate the transfer of funds from PhonePe Account of the resource owner to Amazon to complete the shopping.
